

Leif Håkansson's Square Dancer Rotation

Vad är det?

- Ett datorprogram som talar om för dansare
 - om de skall sitta denna tip
 - vem de skall dansa med
 - om de skall dansa Beau eller Belle i paret
 - i vilken square de skall dansa
- Ett datorprogram som hjälper till att
 - administrera uppgifter om dansare
 - hantera danser med flera dansprogram
 - administrera danser

Varför då?

- Fördelar "sittandet" på ett rättvist sätt
- Blandar dansarna så att man får olika partners i tiparna
- Blandar dansarna för att alla skall någon gång ha dansat i samma square som alla andra
- Tar hänsyn till en hel mängd individuella önskemål

Bakgrund

- Det fanns ett problem med statistiska squarer
- Udda par kom aldrig in i en square
- Matematiker hittade på metoder att rotera par och organisera vem som skulle sitta
- Metoden datoriserades och finns idag som ”computer cards”

Bakgrund

- "Computer cards" klarar inte av tillkommande par och par som lämnar dansen
- Vic Ceder skrev ett datorprogram som kan hantera närvaroförändringar och rotera par
- Vics program är f.n. inte anpassat till singeldansare.
